

Apple Pay[®] is Here.

A new way to pay for eligible healthcare expenses.

UMB customers can enjoy the security and convenience of using their UMB Healthcare Services Visa[®] debit card right from their phone. Apple Pay technology allows customers to pay without swiping or entering card information – pay securely with a single touch of the finger using Touch ID[®]. Apple Pay is:

Easy

UMB and Apple Pay let you use your Apple devices to make eligible medical expense purchases in thousands of participating stores and within apps. Pay with a single touch of your finger using Touch ID.

Confidential

Apple will not share your UMB Healthcare Services Visa card number with merchants. Additionally, the cashier will never see your name, card number or security code.

Safe

Debit card numbers are not stored on your device. Instead, a unique Device Account Number is assigned, encrypted and securely stored when a new card is added.

Reliable

While Apple Pay offers an exciting new way to make purchases within apps or on-the-go, you still get all the benefits and protections offered with your card.

Apple Pay is compatible with:

- iPhone 6 or later
- iPad Mini 3 or later
- iPad Air 2 or later
- Apple Watch
- Mac (on the web in Safari): MacBook Pro with Touch ID, Mac model introduced in 2012 or later with Apple Pay-enabled iPhone or Apple Watch.
